

# Implementation: Accelerator Program

## Fast, Smooth and Cost-Effective Deployment

You can achieve fast and cost-effective deployment of eTask-it when you take advantage of our range of implementation services. Our team of partners can put eTask-it to work for you quickly and smoothly, across all of your operations and locations, integrating with your existing systems.

### FAST TRACK TO etaskit

Our Accelerator Program can significantly speed-up the process of deploying or extending your eTask-it system, with techniques that have a successful track-record, to help you realise the benefits of eTask-it quickly – typically in just one week.

The Accelerator provides an implementation process, consultancy and overall project management to ensure a successful deployment of eTask-it, while minimising the time and effort investment that your organisation has to make.

#### At the end of the Accelerator Program you will have achieved:

- Complete training of eTask-it for a core team of users
- One or more of your key processes documented and translated into powerful Blueprints, ready to be used for consistent and successful project delivery
- Tested platform in pilot project simulation
- Understanding of reports and dashboards configuration, to personalise your business intelligence
- A roll-out approach for the rest of your company, based on our best-practice Blueprint

With our guided implementation of eTask-it you can enjoy the predictability that comes from best practices and focus your energy on the exciting business opportunities ahead.

### ACCELERATOR PROGRAM EXAMPLE

#### Day 1 - Start

- Kick-off Meeting
- Discovery (Requirements)
- Begin Document Design
- Team Breakout Session with SMEs

#### Day 2 - Design

- Design Session (eTask-it design)
- Scope Definition and Agreement (1-2 Business Processes)
- Begin eTask-it System Configuration

#### Day 3 - Configure

- Complete System Configuration
- Configure Reports and Dashboards
- Begin Pilot Testing

#### Day 4 - Test

- Review Pilot Test Results
- Validate Success Criteria is Met
- Prepare eTask-it Launch Event

#### Day 5 - Success

- eTask-it Launch Event
- Finalize Design Document

### Our proven methodology for eTask-it implementation

- Rapidly start the deployment and usage of eTask-it
- Minimise your resources investment while maximising implementation effectiveness
- Build a self-sufficient team to manage your new, integrated eTask-it system
- Create powerful Blueprints of your services
- Smoothly integrate eTask-it with your existing systems and technology
- Build sophisticated reports for your business needs

### Accelerator Bolt-On Options

**Reporting** – plan, design and build key reports and configure dashboards for your business needs – and leave you with the skills and know-how to create your own business intelligence

**Blueprint Process Tuning** – analyse and model enhancements to your existing processes so that your eTask-it Blueprints are as efficiently designed as possible.

**Integration** – design and configure key business systems integration using the eTask-it Web Services interfaces and our preferred Cloud-Based integration platform, Pervasive.

**Full Roll-Out Support** – plan in detail and help you implement a full roll-out of eTask-it within your organisation, including training and change management where needed.
